

Red Fleet Dinosaur Trackway

Red Fleet State Park

APPROX. ROUND TRIP

3.0 miles

APPROX. GAIN

Rolling

DIFFICULTY

Moderate

BEST FOR

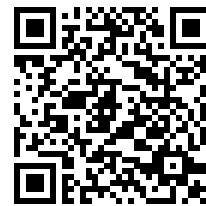

Dinosaur fans and active school-age kids

TRAIL STORY

Footprints older than the reservoir

Three-toed dinosaurs crossed sand here more than 200 million years ago. Their footprints hardened in Nugget Sandstone and now give families a small window into movement through an ancient landscape.

LIVE TRAIL PAGE

Scan for current trail details and trailhead directions.

LOOK FOR - SIGHTINGS ARE NEVER GUARANTEED

- ☐ A three-toed dinosaur track
- ☐ A change in sandstone color
- ☐ A reservoir view
- ☐ A lizard or bird
- ☐ An uphill and a downhill section
- ☐ A track that appears in angled light

THREE TRAIL MISSIONS

- 1 Count the toes on one clear track without touching it.
- 2 Compare your stride length with the space between two tracks.
- 3 Find one place where erosion reveals a new rock surface.

MAP IT!

Draw the rolling route from the trailhead to the track site and mark the reservoir shoreline.

Add a legend: start, water, rest stop, viewpoint and turnaround.

KIND HIKER CODE

- Stay on the signed trail.
- Give wildlife plenty of room.
- Leave plants, rocks and water alone.
- Pack out every snack scrap.

THIS TRAIL'S SMART RULE

Look without touching or tracing the tracks. Use extra caution on wet sandstone and carry water for the exposed return climb.

GROWN-UP CHECK

Weather, access, parking and closures can change.
